Event

Overview

Companies have come to the realisation of the importance of ESG (Environmental, Social, Governance) as a game changer for the business world to respond towards sustainability. The focus has heavily shifted towards the more sustainable, more long-term-oriented version of value creation and to be aligned with UN 17 SDGs. We believe your company has tremendous experience in implementing the ESG strategy or sustainability agenda.

It's time for us to hear from companies on what are their action plans and how they can assist to share their valuable thoughts in driving the related industries in Malaysia.

Speakers are allowed to share their strategies, case studies, as well as related programmes for the upcoming 2023 roadmap.

On the same day, **Sustainable Business Network Association Malaysia (SustNET)** is inviting guests to attend and witness the Certificate-Giving Ceremony to **30 recipients** of the **Malaysia GPM Sustainability Awards 2022**.

There will be opportunities to present the company's business, and network and also as Speakers. Most of the attendees to this ceremony will include industry people, government officials, associations, project managers, training providers, plus those who are coming as recipients of the Awards. We are expecting around 100 to 150 attendees to this grand gala.

We have lined up various speakers in the business forum in the morning and afternoon session.. This will be an opportunity for you and your company to share your strategic thoughts and company's approach in driving the sustainability change towards ESG Compliance and Reporting.
