

# MALAYSIA OCCUPATIONAL DEMAND AND SUPPLY PROJECTION MODEL WORKSHOP

Date: 18<sup>th</sup> to 20<sup>th</sup> January 2024

Venue: Port Dickson, Negeri Sembilan

**TalentCorp**  
GROUP OF COMPANIES

**EU-ERA**

## Workshop Overview

Equipping the labor force with the right skills is one of the policy focuses of any country to support sustainable and inclusive growth. The fact that determination of the future skill surplus and shortage is important for a well-informed and evidence-based policy responses that involve multidimensional interventions such as education and training, international migration and economic sectoral interventions. In the absence of an appropriate analytical tool, it is a great challenge for the policy makers to formulate short- and medium-term planning exercise in a systematic and cohesive manner, thus affecting the quality of policies and strategies to attain socio-economic objective of the country.

Based on the needs and importance of having future skill information, Centre for Future Labour Market Studies (EU-ERA) has taken the necessary efforts to assist Talent Corporation Malaysia Berhad (TalentCorp) and Ministry of Economy in developing a fully integrated labor market forecasting and assessment model.

## Workshop Objectives

Given the completion of the comprehensive labor market forecasting model, the workshop's primary objective is to furnish participants with a deep understanding of its operations. This entails:

1. Providing participants with an overview of the entire modeling process incorporated in the forecasting model.
2. Exploring advanced methodologies employed to predict labor's occupational demand and supply.
3. Offering guidance to participants on the technical utilization of the forecasting model.

## Workshop Outcomes

After completion of this workshop, participants should be able (or know) to:

1. Understand the underlying principles and mechanisms that drive the forecasting model.
2. Delve into the integration of multiple variables employed in the forecasting model.
3. Acquire practical skills for the effective utilization of the forecasting model.

## Complementary:

This workshop does includes:

- ✓ Workshop materials
- ✓ Meals
- ✓ Accommodation
- ✓ Certificate of attendance

## Notes:

All participants are required to bring their own laptop installed with Microsoft Excel.

For better experience, it's best for the laptop to acquire the following requirements:

Processors: intel5 / AMD5  
RAM: 8GB  
Minimum Storage: 10GB
