

# Is your company ready to meet the *EECA* requirements and lead the way in energy efficiency?

## Driving Energy Efficiency for Sustainable Growth:

**DATE: 23 OCTOBER 2024**  
**VENUE: DORSETT GRAND SUBANG**

Are you ready to lead your industry in energy efficiency and sustainability? Join us for a complimentary half-day session designed to help businesses like yours unlock the full potential of the Energy Efficiency & Conservation Act (EECA). In collaboration with Cre8iot, MYIOTA, and MPC, this session will guide you through the process of improving your company's energy management practices, reducing operational costs, and staying compliant with the latest regulations.

### PROGRAM HIGHLIGHTS:

#### AM session (9 am - 12.00 pm)

**EECA Overview & Compliance Essentials:** Learn how EECA compliance is shaping the future of your industry. We'll cover the critical steps your business must take to align with regulatory requirements, including energy monitoring, data capture, and analysis through advanced EE portals.

**Industry Case Study:** Hear a success story from a leading company that has significantly reduced energy costs by 20% while increasing operational efficiency. Discover how similar strategies can work for your organization.

**Exclusive Introduction to the 4-Day Training Program:** Dive into the benefits of our hands-on 4-day training, where you'll learn practical tools for monitoring energy usage, interpreting data, and implementing changes that directly impact your bottom line.

#### PM session (2.30 - 4.30 pm)

**Industry Clinic for Personalized Guidance:** During this interactive clinic, our experts will address your specific energy efficiency challenges and provide tailored advice on the next steps to enhance your operations.

**Networking & Collaboration:** Take advantage of this opportunity to network with industry peers and gain insights from leading experts at Cre8iot, MYIOTA, and MPC. Discover collaborative opportunities to further drive sustainability across industries.

### DID YOU KNOW?

The EECA could help businesses save up to 30% on energy costs annually with the right strategy.

Only 45% of companies in Malaysia are currently compliant with EE regulations. Will you be part of the forward-thinking group leading the change?

By adopting efficient energy practices, industries can cut down on 15-20% of overall operational costs.

**REGISTRATION IS FREE.**  
**SEAT ARE LIMITED!**

### WHY ATTEND?

- **Stay Ahead of EECA Compliance:** Equip your business with the knowledge and tools to meet regulatory requirements without the hassle.
- **Optimize Your Operations & Reduce Costs:** Discover data-driven methods to lower your energy consumption and improve efficiency.
- **Hands-On Expertise from Cre8iot, MYIOTA, and MPC:** Get access to top industry professionals guiding you through every step of the process.
- **Be a Leader in Sustainability:** Position your company at the forefront of energy efficiency innovation through participation in our exclusive pilot program.
