---

## OBJECTIVE

Proactive and detail-oriented IT student with internship experience in software development, seeking to further enhance my skills through a dynamic opportunity that involves both software and networking domains. Eager to apply my knowledge in network design, system maintenance, and programming to contribute to innovative IT solutions while gaining broader industry exposure

---

## AWARDS

- Final Year Project (Zenith: Brainwave) Best Award (2024)
- Computer Science Department Best Award (2023)

---

## PROFESSIONAL EXPERIENCE

### Heitech Padu Berhad

Jan 2025-June 2025

#### Software Developer Intern

- Assisted in developing and maintaining web-based healthcare systems, working across both front-end and back-end components
- Gained hands-on experience with JavaScript, HTML, SQLyog, and JSON in real-world development projects
- Participated in code reviews, system setup, and continuous integration tasks under guidance from senior staff
- Demonstrated strong problem-solving, self-learning, and adaptability when facing unfamiliar technologies and tasks

### Shopee Xpress

May 2024-Jul 2024

#### Warehouse Sorter

- Facilitated effective communication among team members by participating in regular meetings and sharing relevant information about warehouse operations
- Expedited order fulfillment through efficient use of warehouse equipment, such as pallet jacks and forklifts
- Assisted in inventory management by tracking sorted items and reporting discrepancies to supervisors.
- Maintained thorough records of sorted items using warehouse management software systems for accurate tracking purposes

### Twin Continent SDN BHD

June 2023-Aug 2023

#### IT Support Technician

- Perform routine PC maintenance, including hardware and software cleaning, to ensure optimal system performance
- Troubleshoot and resolve technical issues with both hardware and software components
- Educate clients on effective management of their PC files and system reliability
- Collaborate with team members to address complex technical challenges and deliver efficient solutions

---
