- The leading pest control services and hygiene solution provider in Malaysia with over 50 years of experience
- Strong nationwide network of pest control and hygiene branches
- Technical expertise and know-how of a global leader
- Commitment, quality service and quick responses from local staff

Common Pest Threats	
 <p><b>Common Ants</b></p>	<ul style="list-style-type: none"> <li>Some species sting painfully while others have strong biting mouthparts that can easily cut open skin</li> <li>Potential bacteria carrier such as Pseudomonas, Salmonella, due to roaming habits</li> <li>Can easily penetrate food packages, causing damage and contamination</li> </ul>
 <p><b>Cockroaches</b></p>	<ul style="list-style-type: none"> <li>Amazingly adaptable, can live and breed under hostile conditions.</li> <li>Feed and breed in highly unsanitary and moist environment, usually close to food sources</li> <li>Spreading diseases and causing contamination</li> <li>Telltale signs: odour, droppings, egg capsules (ootheca), and moulted body shells</li> </ul>

## Pest Lifecycle

## Treatment

### Residual Spraying

Pesticide is applied to the structural wall lining of infestation area. It eliminates insects when their bodies are in contact with pesticide.

*Note: All pesticides used are registered with the Pesticide Board of Malaysia and applied strictly in accordance with the recommended dosage.*

### Pre-treatment guide

It is advisable to follow the below guidelines to ensure efficacy of the proposed treatment while we maintain the highest standards of safety and service.

- Open all areas in the premises for our Technicians to access during treatment.
- All food items must be kept in air tight and sealed containers
- Open removable panels & all locker doors
- Move cabinets away from wall corners (if possible)
- Remove grease / stains / empty rubbish bins / food residue / rubber floor mat
- Wash floor and walls clean with detergent before treatment

#### Residual Spraying

Pesticide is applied to the structural wall lining of the room, especially in the kitchen or washroom areas. It eliminates insects when their bodies are in contact with pesticide.

#### Gelling

Bait gel is used at cockroach harbourage areas in a small amount especially kitchen area where cockroaches tend to hide in equipments, wall sockets, water sensitive areas, cracks and crevices on the wall.

#### Ultra-Low Volume (ULV) Mist

Device emits out water droplet mixed with pesticide to treat pest harbouring inside the premises.

#### Rat traps

Placed inside tamper resistant bait stations and placed at rodents infestation area

#### Cockroaches Trap

Cockroaches monitoring trap to monitor cockroach's infestation level

#### Thermal Fogging

Eliminates any adult mosquitoes harbouring and breeding in the surrounding compound.
