## BIM & BEYOND

### OVERVIEW

The use of BIM (Building Information Modelling) in the construction today is no longer a luxury .....it has become a necessity in order for designers and builders to construct complex buildings and infrastructure. Highly intelligent and collaborative, BIM allow accurate and real time data transmission and coordination among numerous stakeholders.

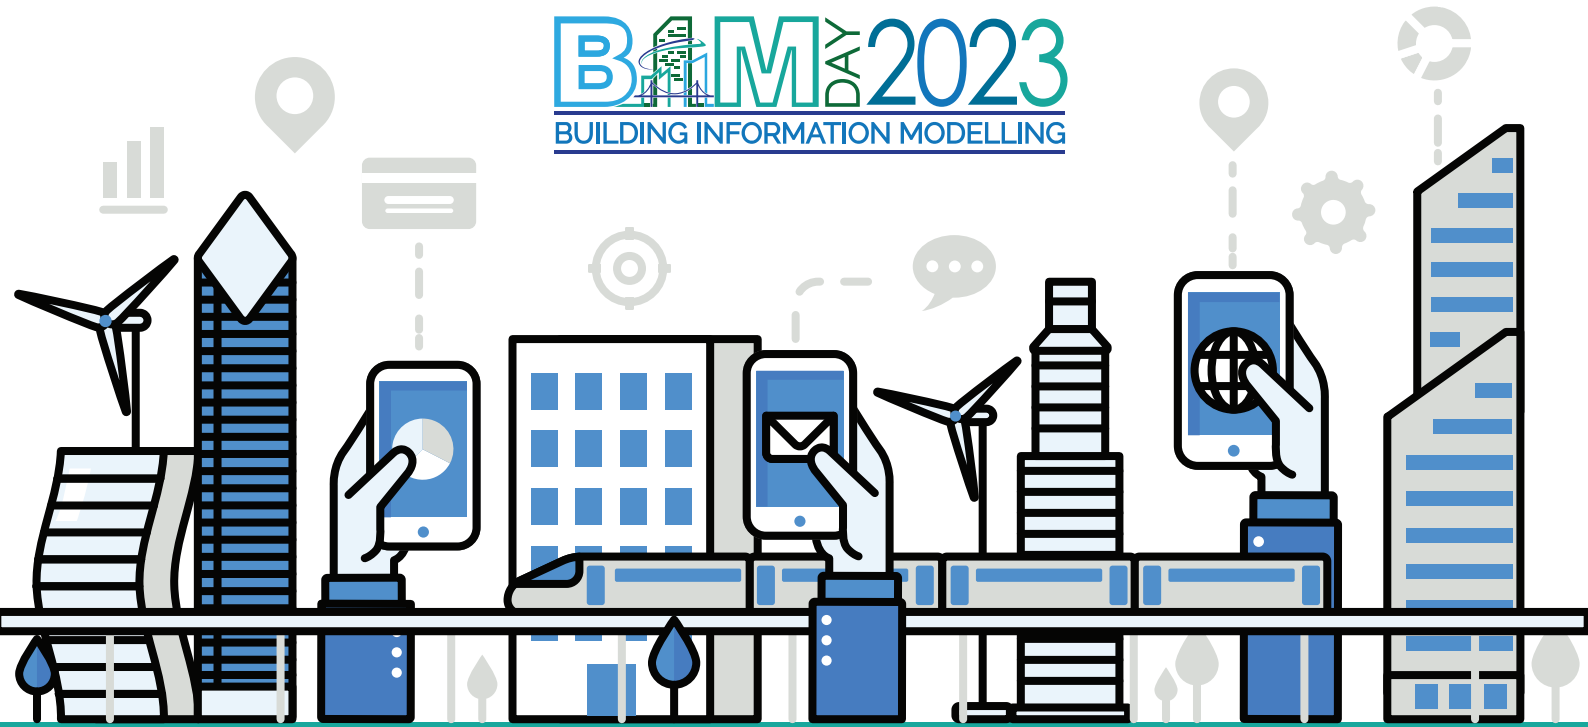

The KL BIM Day strives to promote and drive the adoption of BIM in order to transform the future of the built environment. The event brings together the international and local BIM leaders to play a role in shaping the construction industry to be more sustainable, efficient and productive. The event is designed for professionals that want to improve the industry by sharing best practices, standards and finding better ways of working together to construct a better future.

The panel of speakers are expert who will present the latest technology, software, tools and processes in digital construction. Join us and learn how you can contribute towards a more sustainable, productive and forward-thinking industry.

# KL BIM DAY 2023

BUILDING INFORMATION MODELLING

## YOUR BIM JOURNEY STARTS HERE

With the theme “BIM & BEYOND: the Game Changer in Construction”, The KL BIM Day 2023 is an invaluable three-day opportunity to network with industry leaders and discuss the latest trends and developments for BIM, Digital Twins, GIS, digital design, digital transformation, 3D and other related technology.

The presentations will focus on the role of digital construction technology from concept and design, construction, project management, to the whole lifecycle asset management. Meet and share knowledge with the construction industry BIM champions.

## WHAT WE OFFER

1

### CONFERENCE

We bring together the best minds in the industry to discuss new ways to enhance the construction industry efficiency, productivity and innovativeness.

2

### NETWORKING

Connect with your peers to discuss new developments in BIM and bounce fresh ideas.

3
