

Indian Chemical Council has been working for the benefits of the chemical industry for decades now.

The initiatives of Indian Chemical Council - **Responsible Care & Nicer Globe**, are to strengthen the process, practices and provide assurance to the industry and other stakeholders.

Responsible Care is a global initiative, while Nicer Globe is the need recognized by the Indian chemical industry to provide emergency support during on road incidents, improve the logistics standards and operations.

Through Nicer Globe, our attempt is to build ownership to the process. The logistics event LOGNEXT is one such effort in bringing the stakeholders together to create awareness and push the envelope ahead.

NICERGLOBE LOGNEXT

ABOUT THE CONFERENCE

NG LOGNEXT is an annual conference organized by the Indian Chemical Council to bring together global and Indian players in the chemical industry. The conference aims to provide a platform for stakeholders to discuss debate, share insights, and explore potential opportunities and collaborations. The theme for this year's conference is "Striving Excellence Building Resilience" which emphasizes the need for standards and collaborations to meet the expectations of stakeholders.

The Indian Chemical Council has been working for the benefit of the chemical industry for decades. One of their initiatives, Responsible Care, is a global program adopted worldwide to strengthen processes and practices and provide assurance to the industry and other stakeholders. Nicer Globe is a unique solution for the local needs of the chemical industry, providing emergency support during on-road incidents and improving logistics processes and practices while building ownership.

The Logistics conference held last year focused on bringing the best in the industry together. This year, the focus

is on defining standards and collaborations to meet those standards. The conference is an opportunity to understand ground realities, set expectations, identify partners and work towards accomplishing objectives. The best in the industry will deliberate and derive solutions, and Nicer Globe will play a constructive role in fulfilling and delivering on set expectations.

Last year's conference was held at the Sahara Star Mumbai in July and had large participation from business leaders, government representatives, key stakeholders, subject matter experts and professionals from India and globally. One of the highlights of last year's event was the Memorandum of Understanding with Intel Solutions and Services India Pvt Ltd, where their technology was adopted within the Nicer Globe members. This year's event will feature the participation of business leaders from the industry, government representatives, subject matter experts and professionals across the supply chain.

All stakeholders associated with the chemical industry, who are striving to raise the bar, should participate in the event, ensuring that they are heard and play an active role in finding solutions. The participation of relevant and responsible stakeholders is critical as the logistics sector gains importance and strives to be the change.
