

# SUSTAINABLE PRACTICES IN PROJECT MANAGEMENT (3 DAYS)

## Objective:

To assist in developing sustainable practices in management and operations for companies with international sustainability standard requirements.

## Overview:

This Workshop begins by presenting the concept of sustainability in GPM. We cover the potential of GPM to address sustainability issues and discuss the relationship between the two. We look at case studies that show how companies and organizations practice GPM and how practitioners are achieving greater sustainability in their projects and beyond.

## Learning Outcome:

1. Apply sustainability principles to projects
2. Identify issues and impediments to integrating sustainability
3. Adapt sustainability tools and goals: P5 model and UN Sustainable Development Goals (SDGs)
4. Assess a project using IPMA Project Excellence Baseline (PEB) in a customized way.
5. Benchmark their company or organization regarding project success
6. Translate sustainable development into practical project- based actions.

Date : TBC  
Duration : 3 days  
Time : 9am to 5pm  
Venue : Think Plus Academy,  
Kuala Lumpur
